How can I check if a domain name is free or not?

Agent - 2026-10-22 - New registration of domains

If you want to check if a .se or .nu domain name is free or not, you can use the Free service. The free service is available on below links, one for .se and one for .nu:

http://free.iis.se/

http://free.iis.nu/

The service responds with "free" if the domain is free and "occupied" if the domain is already registered. Here is an example, http://free.iis.se/free?q=example.se
