# As a DNS operator, how do I create a CDS record?

Agent - 2023-07-05 - Automated DNSSEC

**I work as a DNS operator, and one of my clients has requested to exchange signing keys. Can you guide me on how to create the CDS record?**

Typically, your nameserver should support this function unless you have an outdated version. Notably, *PowerDNS*, *Knot*, and *Bind* have integrated this feature.
