Isn’t there a risk that the quality of the register will decline after multipleyear payment is implemented?

Agent - 2024-05-31 - Handling of registrant information

The Swedish Internet Foundation believes that the advantages of multi-year payment outweigh the risks of a decline in the quality of the register. In accordance with the registrar agreement, a registrar is obligated to control that the registrant’s contact information is complete and correct when the domain name is registered as well as on an annual basis henceforth.
