Which certificates can I use?

Agent - 2024-11-21 - Miscellaneous tech

The only validation of our new EPP servers is the certificate's validity date, which means that all certificates, regardless of issuer, are valid.

EPP certificates are handled by the registrars. Our registrars can change and update certificates themselves for .se and .nu when they are logged in to the registrar account at the registrars' website (registry.se).
